

## **mDOAS version 3 - Installation Instructions**

Christoph Kern

[ckern@usgs.gov](mailto:ckern@usgs.gov)

### **mDOAS**

The mDOAS software itself does not require installation. Simply unzip the mDOAS folder to a location on your hard drive. It is important that you have full read and write permissions to the installation folder. If you wish to use pre-configured settings, please unzip directly to the C:\ drive such that executable is located in `C:\mDOAS_v3.xx\mDOAS.exe`

mDOAS version 3 requires a Windows 64-bit operating system and the following free applications to be installed on your computer:

### **Matlab Compiler Runtime**

Please install version 2020a (9.8)

<https://www.mathworks.com/products/compiler/matlab-runtime.html>

### **DOASIS**

Please install in the default directory `C:\Program Files (x86)\DOASIS\`

<https://doasis.iup.uni-heidelberg.de/bugtracker/projects/doasis/download.php>

or, if the above link doesn't work, use this mirror:

<https://vdap.org:5001/sharing/M94JgInfA>

### **Ghostscript**

Again, please install in the default directory `C:\Program Files\gs\gsx.xx`

<http://www.ghostscript.com/>
